Anti- Seizes

Sealants

Threadlocker

Dynatex Heat Transfer Compound is a grease-like silicone material, heavily filled with heat conductive metal oxides. Dynatex Heat Transfer Compound is used as a heat transfer medium in the electrical and electronic industry for facilitating heat dispersion. Withstands high and low temp (-65°F to +400°F), water resistant, chemically inactive and hydrolytically stable. NLGI #2 Has been useful on thermocouple and thermometer wells, mounting semi-conductor devices and thermo joints.

Dynatex is an ISO 9001 certified manufacturer and packager of branded and private label chemicals for everyday Automotive, Heavy Duty and Industrial Maintenance Markets
